Appendix A: Zoning

Section 1.07. Definitions.

Solar energy system (SES): a device or structure that collects, stores and distributes solar energy for electric generation, water heating, space heating or cooling and other purposes.

Solar energy system (SES), Ground Mounted, Site Specific: a small, ground mounted SES located on a lot intended to provide electricity used, consumed or metered by the dwelling or structure located on the same or an adjoining lot. For purposes of this definition, an adjoining lot shall include a lot located across a public road or street from the lot on which the dwelling or structure is located.

Section 8.03. Conditional Uses.

Conditional uses in the AG-1 district are as follows:

- i. Solar energy system (SES), Ground Mounted, Site Specific
